Sir:

Pursuant to compliance with 37 CFR 1.21 (d), based on Examiner's requirements, a connection between the two switch units in Fig. 13 is amended via a control line. Note that Fig. 13 is a detailed block diagram of 1210 as shown in Fig. 12. As can be seen in Fig. 12, the block "1210" is controlled via the control line by the block of 3G W-CDMA and UWB OFDM multiband control processor labeled with 1240. Thus, the control line "to 1240" is not a new addition for Fig. 13.

In the top margin, all of the figures from 1 to 22 have been labeled "Replacement Sheet." The replacement sheet of drawings includes all of the figures appearing on the immediate prior version of the sheet.
